

Unit 2: Writing a Paragraph

A paragraph is a group of sentences about one topic. A good paragraph has three parts. A topic sentence, supporting sentences, and a closing sentence.

The topic sentence tells the reader what the paragraph is about. It comes first.

Supporting sentences give more information about the topic. They explain, describe, or give examples.

The closing sentence ends the paragraph. It summarises or wraps up the idea.

Here is an example paragraph.

My favourite animal is the elephant. Elephants are the largest land animals on earth. They have long trunks which they use to drink water and pick up food. Elephants live in family groups and take care of each other. I love elephants because they are intelligent and kind animals.

The topic sentence is: My favourite animal is the elephant.

The supporting sentences tell us facts about elephants.

The closing sentence explains why the writer loves elephants.

Now try to write your own paragraph. Choose a topic you know well. It could be your home, your school, a food you like, or an animal you find interesting.

Start with your topic sentence. Then write three or four sentences with more information. End with a closing sentence.

Writing a paragraph takes practice. Do not worry if your first one is not perfect. Every time you write you are getting better.
